Length	3500mm
Width	1500mm
Height	2750mm
Weight	1100kg
Blades	2 (double edge)
Rollers	2
Roller Opening	290x220mm
Cutter Rate	42 m/s
Fuel Consumption	4.9 l/h
Fuel Capacity	20L
Starter	Electric

## POWERFUL COMPACT

## CH150-Turntable woodchipper

The CH150D is a wood chipper designed to take material of up to 6" in diameter. Its roller opening is greater than this which allows awkward material in.

This machine is mounted on a single axle, turntable which makes work easier when wood is not directly behind the machine, for example, when working on the road side, or feeding from the side of a driveway.

A 'State of the Art' stress control is a standard on this machine and included in the price.

**POWERFUL COMPACT**

**KDO 90/GX390 - Chipper/Shredder**

This chipper / shredder is designed for small branches, up to a maximum of 100mm fed through the chipper chute in short lengths. It will also take dirty material such as roots and small pieces of timber with nails through the shredder chute.

The discharge chute allows the filling of bags, skips, trailers etc. With ease. The powerful 13hp engine and heavy construction makes this a machine for the professionals as well as domestic use.
